#### DEAR READERS,

Sustainability requires more than just individual measures – it requires a fundamental change in the way we run our company. In this sense, our strategic direction is clear: we don't just wish to be economically successful, but to also have a positive impact on society and the environment. Hence, it is necessary to constantly scrutinise our processes, improve and continue to seek new solutions that are responsible in an ecological, economic and social sense.

Our family business is now in its third generation of management. Sustainable activity is a matter close to the heart of all our shareholders. Through innovation, responsibility and constant improvement, we strive to enable a worthwhile future for subsequent generations.

capital. With numerous benefits and conti-In specific terms, we have set ourselves the objective of reducing CO<sub>2</sub> emissions by 30% nual improvement, we create incentives and a per product by 2030. To this end, the compaworking environment in which our workforce ny has derived its own guiding principles from feels at ease. Only together can we achieve our ambitious goals and continue to flourish. three UN sustainability goals and defined individual measures on this basis. We are following this objective step by step in numerous Yours, Christine Steps projects and are making good progress towards achieving it. At the same time, we are Christine Steger, Managing Director investing in modern technology and digitali-MANN & SCHRÖDER COSMETICS sation. Our employees are our most important

#### **REPORT PROFILE**

#### **REPORTING BOUNDARIES AND DATA COLLECTION**

All information in this report relates to the business activities relevant to the sustainability of MANN & SCHRÖDER COSMETICS and its locations in Germany. These include operations in Siegelsbach, Hüffenhardt, Gundelsheim and Mannheim.

This MANN & SCHRÖDER COSMETICS sustainability report covers developments in 2023 (1 January to 31 December 2023). We have also included significant events and achievements up to the editorial deadline in November 2024 to ensure that the information contained in the report is up to date. Additional content is also available online on the company website www. mann-schroeder.de. The report is published in German and English. The next sustainability report is expected to be published in the second half of 2025 and will cover the 2024 financial year.

#### **APPLICATION OF THE GRI STANDARD**

As in the 2022 reporting year, this sustainability report is based on the guidelines of the Global Reporting Initiative (GRI), which continues to be the most globally recognised basis for comparability and transparency. We already prepared the sustainability report in accordance with the GRI standards in 2018. For 2023, the reporting of the core option is comparable to the previous year. Along with our key sustainability points, we are focusing in this report on further company-relevant sustainability endeavours at MANN & SCHRÖDER COSMETICS.

#### EDITORIAL NOTE

To ensure better readability, this report does not use gender-specific differentiation. All role designations apply to all genders in the sense of equal treatment (AGG).

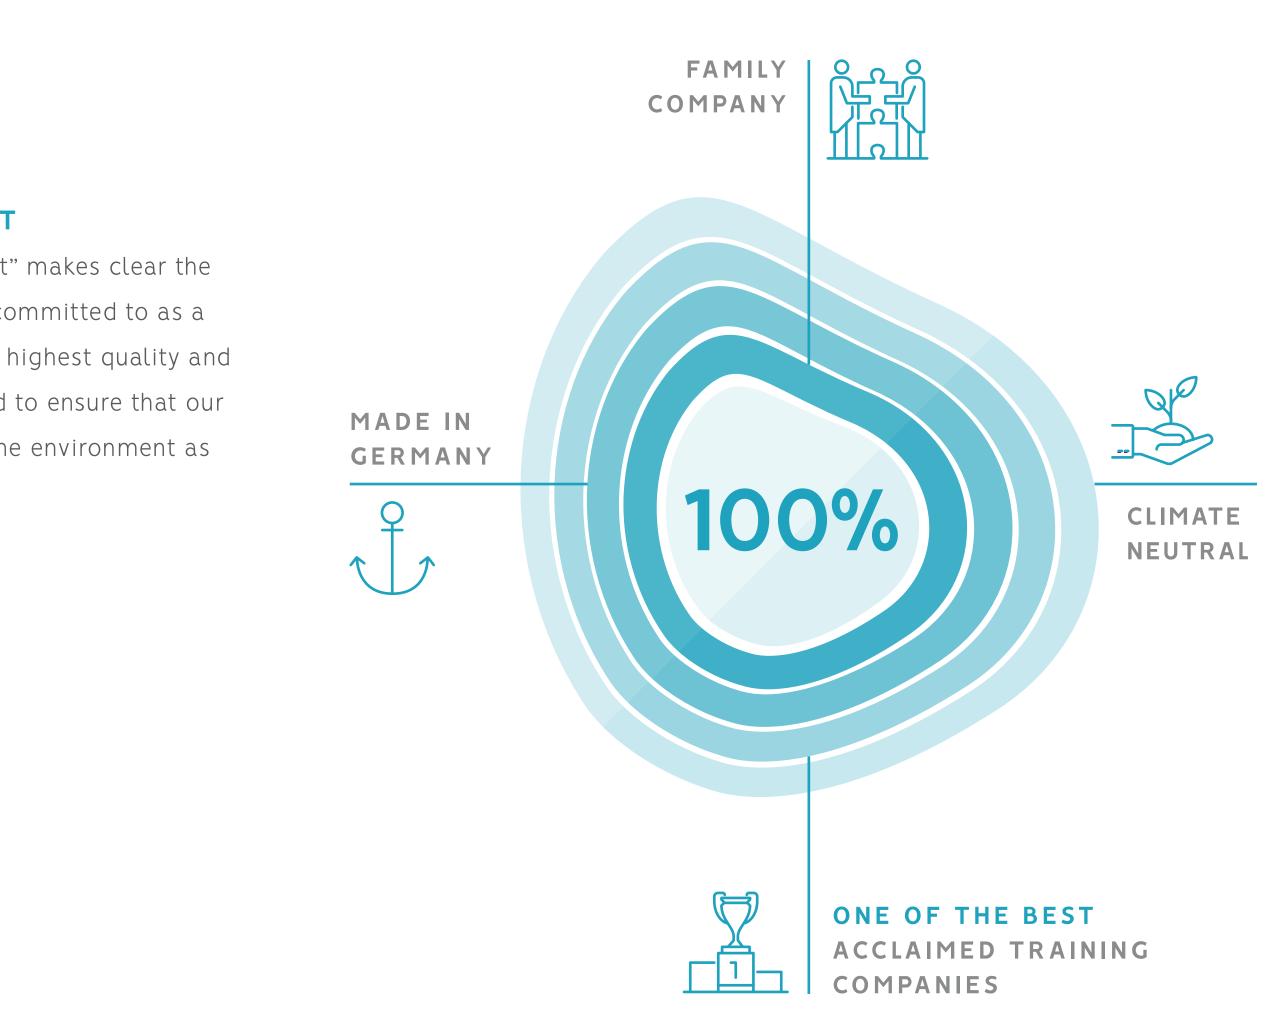

## INTRODUCTION TO MANN & SCHRÖDER COSMETICS

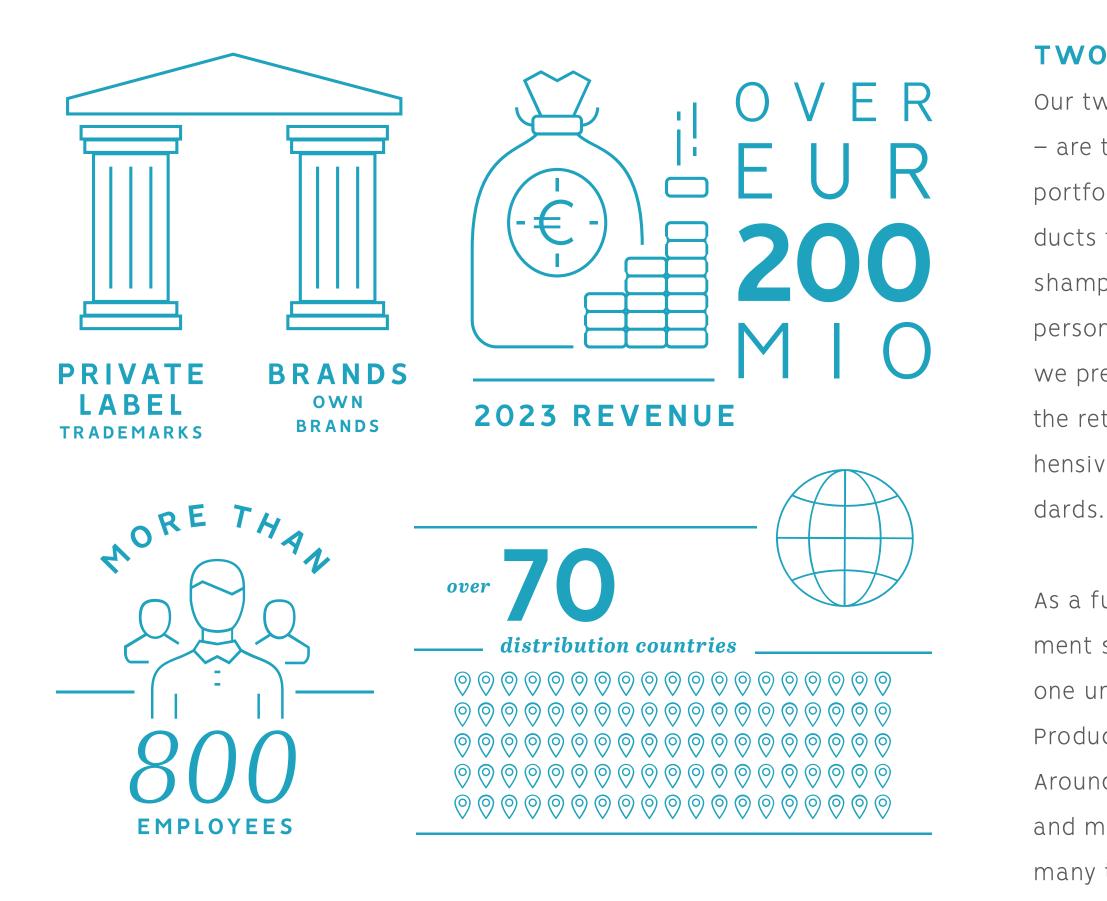

MANN & SCHRÖDER COSMETICS is a German family company specialised in manufacturing hair and personal care products. Since it was founded in 1951, the company has had its headquarters in Siegelsbach and now has four locations in Baden-Württemberg. A small business that began with the production of window putty and floor polish has developed into an innovative cosmetics company and one of the strongest private label manufacturers in the German-speaking region.

Christine Steger has been managing MANN & SCHRÖDER COSMETICS in its third generation since 2015. Sustainability aspects are an integral part of all product developments and concepts.

#### FOR YOU, FOR THE PLANET

The motto "For you, for the planet" makes clear the dual responsibility that we have committed to as a company: offering consumers the highest quality and best possible care experience and to ensure that our actions have as little impact on the environment as possible.

#### **TWO BUSINESS AREAS**

Our two business areas – own brands and private label – are the two pillars of our business model. Our brand portfolio is made up of hair and personal care products for the whole family. From shower gel and shampoo to sun protection, we produce almost all personal care categories. In the private label sector, we predominantly serve large drugstore chains and the retail food trade. Our customers value our comprehensive advice, coupled with our high quality stan-

As a full-service provider, we unite all areas to implement sophisticated brand concepts and products under one umbrella: Research & Development, Marketing, Production, Quality Assurance, Sales and Logistics. Around 800 employees work hand in hand to develop and manufacture personal care products made in Germany that are kind to the skin and the environment.

#### **TRADITION MEETS INNOVATION**

With both own brands and private label, the name MANN & SCHRÖDER COSMETICS stands for passion and responsibility, quality and sustainability in equal measure. In total, more than 2,000 different products are manufactured with state-of-the-art systems and sold in almost 70 countries. Our company's success story is based on a harmonious unity between tradition and innovation, which will continue to define our future activities. For ten years, we have been increasingly using energy-saving production processes and focusing on maximising energy efficiency when purchasing new systems. Our power supply is 100% green energy and we fully offset our CO<sub>2</sub> emissions through climate protection projects. Since 2019, we have been pursuing ambitious sustainability goals with our own project team for sustainable packaging.

#### **VISION 2045**

As a company with deep-seated sustainability goals in its strategy, MANN & SCHRÖDER COSMETICS is happy to be a role model and proud to present its sustainability initiatives to the wider public.

As part of the **Vision 2045** documentary film series, MANN & SCHRÖDER COSMETICS presents its activities related to sustainability and environmental protection in a short film.

As well as the management, various experts from the areas of Research & Development, Quality Assurance and Marketing have their say. Using specific examples, they demonstrate how the company combines profitability with social and ecological responsibility and is able to reduce its ecological footprint in future.

These include optimisation measures for packaging and formulations, as well as production and logistics. In addition, MANN & SCHRÖDER COSMETICS is actively participating in the further development of scientific insights with regard to other environmental categories. Social projects in Africa support efficient and resource-saving water treatment (after the end of filming in India, see chapter Social commitment, page 59 ff.).

The Vision 2045 initiative shows with its films how leading global corporations and SMEs are taking sustainability seriously and integrating it into the DNA of their own companies.

# OUR SUSTAINABILITY STRATEGY

**REPORTING ACCORDING TO** 

#### SUSTAINABILITY MANAGEMENT

#### SUSTAINABILITY MANAGEMENT

## WE CARE<sup>2</sup>

We believe that we can only be successful in the long term with a well-founded and transparent sustainability strategy. Sustainable activity is now inextricably linked to our innovative strength.

ur holistic approach includes acting in accordance with ecological, economic and social aspects, whilst we implement our high standards of product quality and safety in all areas of the company on a daily basis. As a company, we have been climate-neutral since 2017 and have defined the further reduction of CO<sub>2</sub> emissions as an overarching sustainability goal.

As a family business, we also think about future generations and organise our business activities in order to inspire today's consumers with great products without burdening the world of tomorrow. Our credo is: "What's good for the skin should not harm the environment."

#### OUR SUSTAINABILITY STRATEGY

OVERVIEW

## "WHAT'S GOOD FOR THE SKIN SHOULD NOT HARM THE ENVIRONMENT."

#### SUSTAINABILITY MANAGEMENT

## ORGANISATION & MANAGEMENT

At MANN & SCHRÖDER COSMETICS, the overall responsibility for sustainability lies with the management.

n the course of regular sustainability meetings, the Sustainability Team defines the key sustainability projects, analyses progress and makes further decisions. Members of the Sustainability Team are representatives of various departments within our company with a direct connection to the defined projects. Together with an extended team of experts, they are also responsible for the operational organisation and monitoring of sustainability issues within the company.

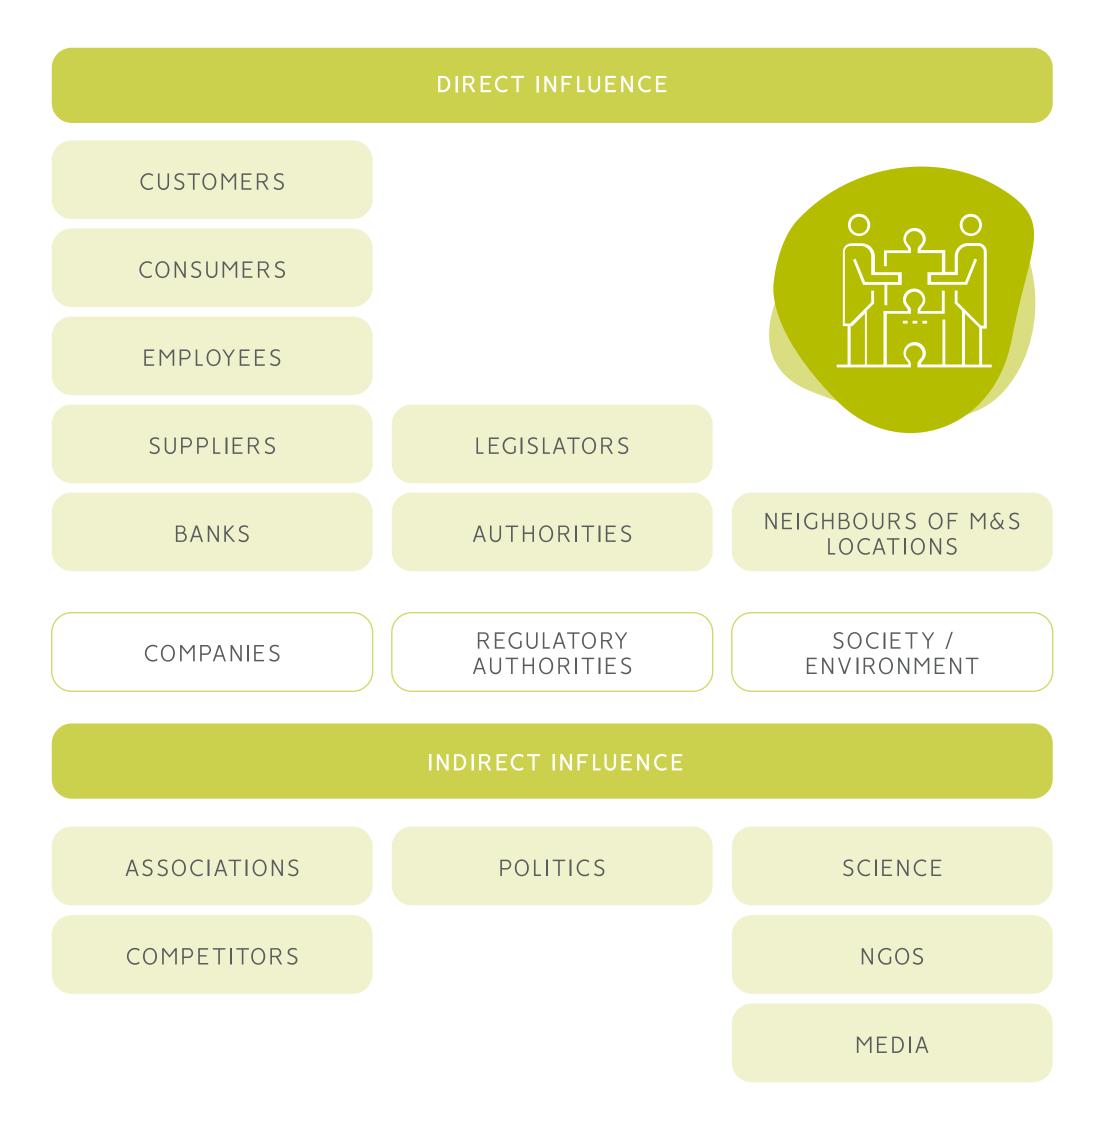

#### OUR SUSTAINABILITY STRATEGY

#### **STAKEHOLDER MAP**

#### STAKEHOLDER-DIALOG

# **STAKEHOLDER GROUPS AND THEIR INFLUENCE**

n order to successfully integrate the sustainability factor into all of our corporate processes in the long term, it is important to take into account the different expectations and interests of our most important internal and external stakeholder groups. Hence, we are in regular dialogue with the individual stakeholder groups and use the feedback we receive to continuously improve our own sustainability strategy and the measures derived from it, as well as to further develop sustainable concepts. The key stakeholders are visualised using the stakeholder map (left).

As a manufacturer of personal care products, we take the interests of our stakeholders into account when making decisions and, conversely, consider the impact of our decisions on others. Stakeholders include customers, consumers, employees, suppliers, journalists, scientists, neighbours, authorities and associations. Contact and dialogue with stakeholders usually takes place on a decentralised basis and is the responsibility of the respective departments and employees.

We are in dialogue with

### **CONSUMERS** via telephone, e-mail and social media platforms.

#### Our

and also liaise directly with our customers in cross-functional teams.

#### OUR SUSTAINABILITY STRATEGY

#### OVERVIEW

In the

## **COSMETICS INDUSTRY**,

we are a reliable manufacturing partner and engage in dialogue with organisations and associations to promote sustainable products. We have helped establish initiatives and longterm partnerships.

As a member of various associations, we play a key role in the development and establishment of

## INDUSTRY STANDARDS AND GUIDELINES.

#### BUSINESS-RELEVANT UN SUSTAINABLE DEVELOPMENT GOALS

# **GLOBAL GOALS FOR** SUSTAINABLE DEVELOPMENT

MANN & SCHRÖDER COSMETICS takes into account and supports through concrete measures the implementation of the 17 Sustainable Development Goals (SDGs), which were adopted by the 193 member states of the United Nations in September 2015.

he United Nations' 17 Sustainable Development Goals (SDGs) serve as a guiding framework for companies to align their business activities with sustainable development. In 2018, we began to identify the SDGs relevant to our company. An SDG is relevant for us if there is a significant positive or negative impact from or on MANN & SCHRÖDER COSMETICS. With our products and solutions,

The following page provides examples of how we make a positive contribution to achieving our commitment to sustainability contributes the respective SDGs. We are always aware that to the realisation of global development goals. our business activities may also have critical impacts in some cases. To determine the impact of MANN & SCHRÖDER COSMETICS, we have used the assessments of external stakeholders and the results of our materiality analysis (see page 15).

Life on land influences life in water. Hence, as a 100% climate-neutral company, we want to reduce our CO<sub>2</sub> emissions at our production sites as well as contributing to the protection of life under water. Thus, we already formulated solid microplastics out of all our products in 2019 and offer solutions without synthetic polymers for 100% of our products.

This is because only ecologically intact marine and coastal ecosystems ensure the preservation of biodiversity and therewith global food security. They are vital for the global climate system.

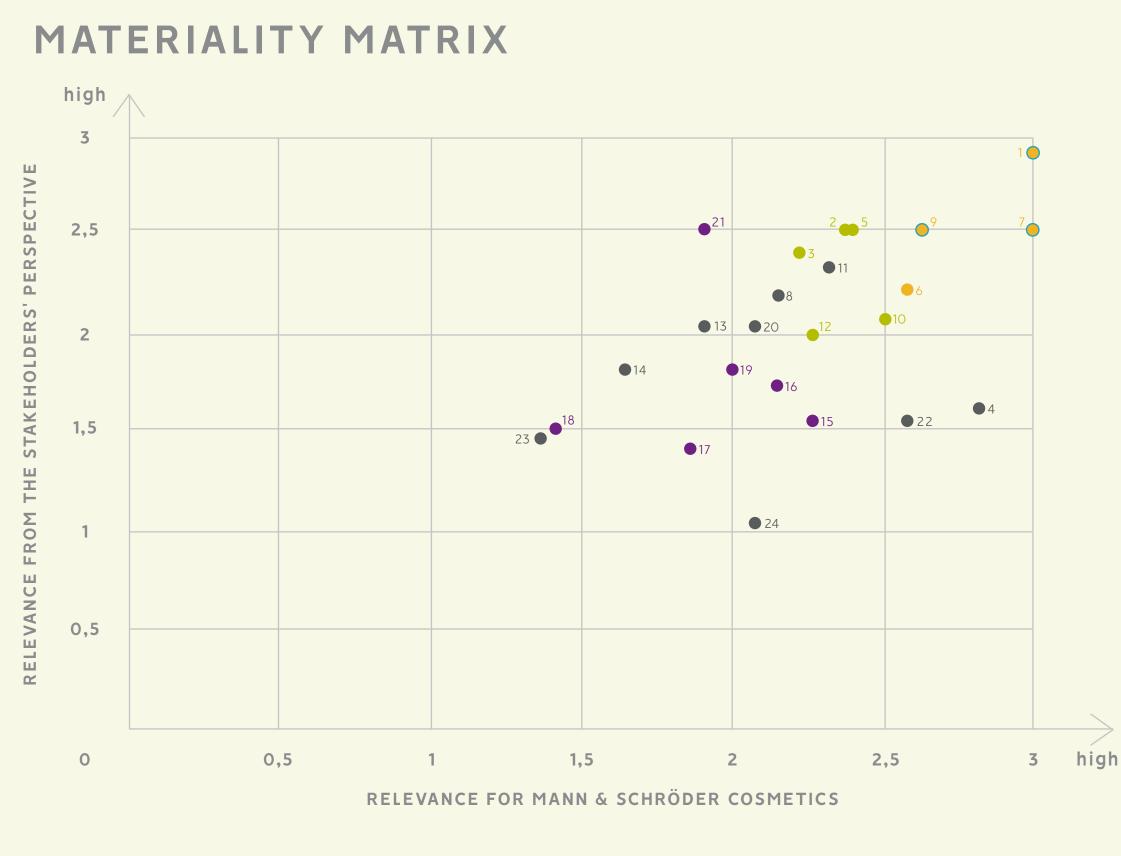

The deforestation of international native forests is a constant threat to our planet – in terms of endangered biodiversity and increased CO<sub>2</sub> emissions.

Since 2023, we have been supporting the Efficient Ovens project in India, which saves CO<sub>2</sub>, protects forests and offers poorer families health benefits thanks to clean cooking methods. In this way, we combine climate protection and social commitment.

We support the goal of promoting sustainable and resource-conserving consumption. On our product packaging, we inform end customers about environmentally friendly disposal of bottles and tubes and specifically use secondary packaging with a high recycled content. As a member of the Forum Rezyklat, we are committed to a stronger circular economy and, together with other partner companies, support the sensitisation of consumers to recycling

#### DETERMINING THE KEY REPORTING TOPICS

## MATERIALITY ANALYSIS

The basis for our reporting is our materiality analysis, which includes all relevant topics from our stakeholders.

e have also added topics that were identified as material with regard to the business development of MANN & SCHRÖDER COSMETICS and its impact on employees, the environment and society, but which are not covered by the GRI Standards. In order to identify the material topics, a survey of all internal experts was conducted again in 2023, which also included the perspective of stakeholders. The topics already defined in previous years were again allocated points by each expert in 2023 and assessed in terms of their business relevance, existing stakeholder expectations and possible serious – particularly negative – impacts. The graphic of the materiality matrix (left) shows the most important sustainability topics for MANN & SCHRÖDER COSMETICS according to stakeholders and internal experts.

#### FAIR AND TRANSPARENT

# VALUES AND SOCIAL **STANDARDS**

Our daily actions are based on our values in compliance with rules and laws.

e believe that this solid foundation of values is inextricably linked to our responsibility towards our customers and employees. Hence, we have integrated clearly defined values into our day-to-day work and convey this aspiration to all employees. As an employer of more than 800 people, we see it as our duty to ensure fair wages and working conditions.

To make high social standards measurable, we were certified in accordance with the SMETA social standard for the first time in 2022. This makes our high social standards and fair working conditions transparent and verifiable. We value a trusting, open and inclusive working environment and treat each different nations. As in previous years, more women than men were employed by MANN & SCHRÖDER COSMETICS in 2023. We value different perspectives, experiences and skills and believe this is the only way to discover the best possible implementation methods. Since autumn 2023, we have been specifically promoting workplace participation for all employees through daily meetings with managerial levels.

other with respect. There were no cases of discrimination in the workplace in the reporting year 2023. We demand that our suppliers, customers and other business partners ensure fair working conditions for their employees and temporary workers. **DIVERSE WORKFORCE** Gender equality is essential for us as an innovative company, as well as promoting diversity in every form. Our employees comes from 39

#### OUR SUSTAINABILITY STRATEGY

#### **IMPARTING KNOWLEDGE**

Our corporate culture is constantly evolving. We encourage a sense of togetherness, because we know that good teamwork within the workforce is essential for our company's success. We train and sensitise all employees to behave with integrity and in compliance with the law. The basics are already imparted during the onboarding of new employees.

#### ENTREPRENEURSHIP

We act and think entrepreneurially, because we take responsibility and think outside the box. We have the courage to seek out and explore new paths. In everything we do, we focus on the needs of our customers.

#### PARTNERSHIP

Trust, respect, openness and reliability form the basis of our daily co-operation. We see ourselves as a team, even across departmental boundaries. Everyone works hand in hand to achieve the best possible result together. We maintain longterm relationships with our customers and suppliers, characterised by partnership, reliability and fairness.

#### EXCELLENCE

High quality, continuous innovation and the responsible use of resources are our top priorities. We are constantly adapting our closely interlinked work processes to the changing requirements of the markets. This enables us to work efficiently and in a service-orientated manner in order to always achieve outstanding results.

#### OUR VALUES ARE PART OF OUR DNA

As a family company, the satisfaction of our customers is our top priority. We achieve this goal thanks to qualified, motivated employees and reliability and high quality. We enjoy our work and have learnt that respectful cooperation strengthens our system and opens us up to new ideas. When selecting our raw materials, we set great store by high, pollutant-free quality. We invest a lot of time and energy in researching and implementing sustainable product solutions and use resources responsibly.

We defined our three core values many years ago and have not lost sight of their relevance to this day.

OUR

## VISION

"At home in every bathroom."

Our aspiration is to inspire our customers with high-quality products and innovations. On this basis, we wish to expand our two business areas – brands and private labels – and in the long term become the most competitive medium-sized company in Europe.

#### Our goal:

300 million euros in turnover and a CO2 reduction of 30% by 2030. Shaping the cosmetics world of tomorrow for the better.

We want to inspire our customers every day with innovative and high-quality products. With passion and responsibility, we represent quality and sustainable care for every individual and our planet. We Care<sup>2</sup> means: We always care in two ways:

Brands – Private labels Passion – Responsibility Quality - Sustainability Every individual – Our planet

#### OUR SUSTAINABILITY STRATEGY

## OUR MISSION

We Care

## OUR STRATEGY

In our 2030 Strategy, we have set out our ambitions with regard to growth and sustainability in concrete targets.

Our values-based approach to resources, employees and partners is the ethical compass on the path to achieving these goals. We develop and produce all our products according to the criterion of sustainability and continuously work on the expertise of our employees in order to further strengthen our innovation potential. We take advantage of the opportunities offered by globalisation and digitalisation and think ahead in terms of sustainability.

#### COMPLIANCE

Our compliance culture is firmly integrated into our everyday life and is based on our values and social responsibility. Our employees are sensitised to these values and treat each other and business partners with respect and fairness. In addition, our corporate principle applies: "We comply with applicable law and internal guidelines". This is binding for all employees. In regular training sessions and through broad internal communication, all instructions and rules are communicated transparently so that they can be implemented at all levels.

#### **COMPLIANCE MANAGEMENT SYSTEM**

In 2022, we established a centralised compliance management system to firmly establish and monitor legal regulations and occupational health and safety measures. The compliance system gives us an overview of the hierarchy of responsibilities, reminds us to obtain all necessary authorisations and regulates important requirements in the operational areas, occupational health and safety (hazard prevention) and data protection. The tasks are distributed across the respective division and team managers. Our compliance officers check potential business partners with an additional compliance programme and support the management with a wide range of compliance issues.

#### **OCCUPATIONAL SAFETY**

In order to maintain our high quality standards and to continuously develop ourselves further, we promote further training programmes and conduct internal training courses. The occupational safety department provides training on occupational safety, hygiene and data security at regular intervals. It also chairs the three-monthly meetings of the Occupational Safety Committee. The meetings are attended by a member of the management and the works council, as well as safety officers from all departments and the company doctor. The company doctor also carries out work-related examinations and advises on all health issues. Safety and accident prevention are given the highest priority in our company. We not only take responsibility for products of impeccable quality, but also for the health and safety of our employees.

#### **CODE OF CONDUCT**

Based on our values of entrepreneurship, partnership and excellence, our Code of Conduct is intended to serve as a guideline for all employees. At the same time, it is a binding minimum standard that defines and specifies the key requirements with regard to our social, ecological and economic responsibility within the company, both in our dealings with colleagues

#### OUR SUSTAINABILITY STRATEGY

# OVERVIEW

### and in relation to our role as a business partner in the supply chain. Last but not least, the Code of Conduct is based on international guidelines and principles, which are supplemented by all local and national laws as well as all other applicable laws, international standards and norms and other applicable regulations.

#### PUTTING TO THE TEST

# ANNUAL AUDITS

e work according to internationally recognised management systems in order to make our aspirations of quality, safety and sustainable management measurable and transparent in all areas of the company. These systems are audited at regular intervals by external auditors. Certificates, which we receive from the testing institutes after a one-day or multi-day audit, testify to the requirements of the respective standard being implemented.

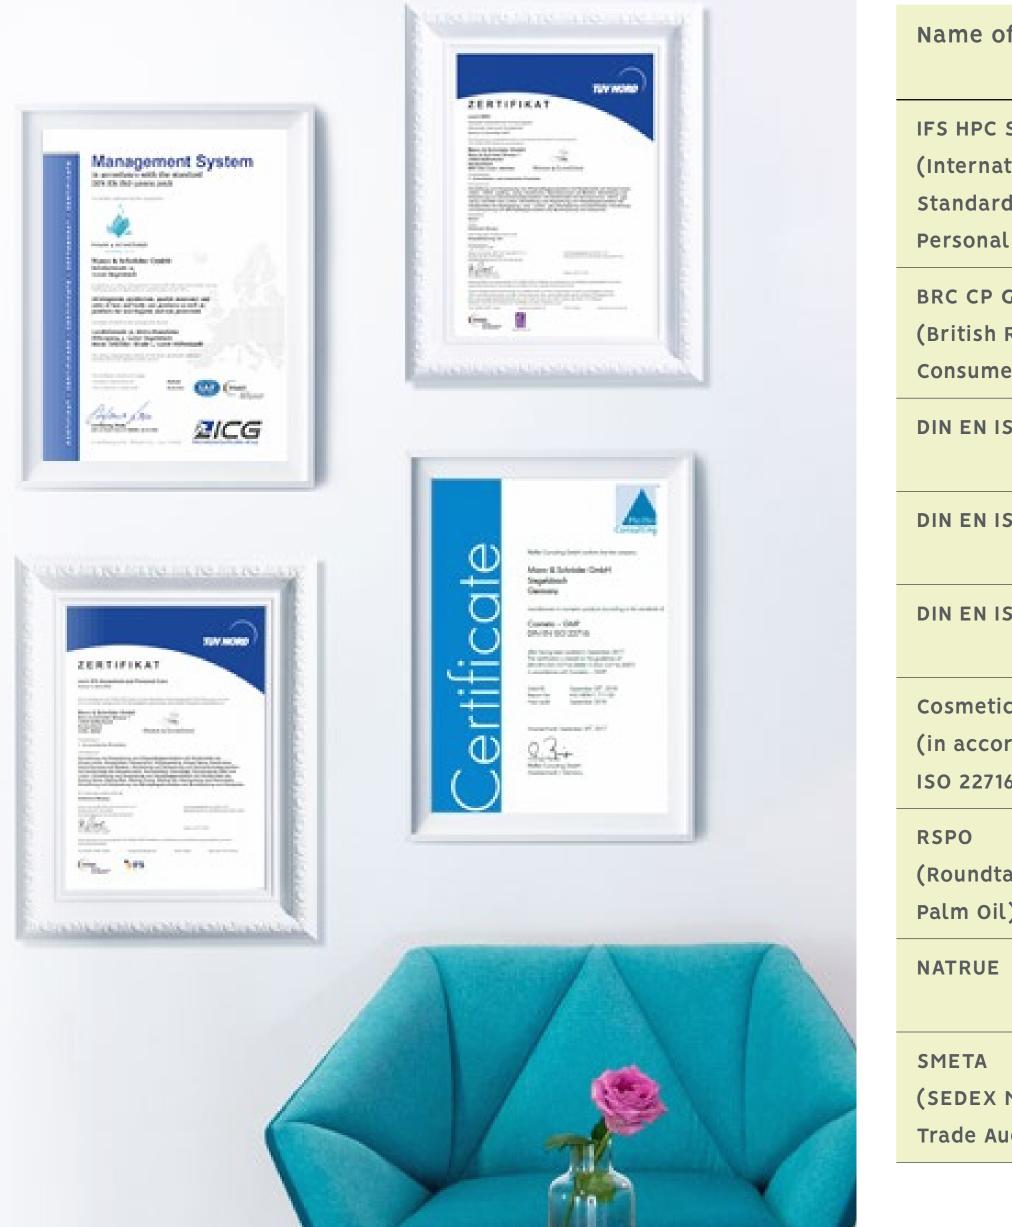

In addition to the usual industry and sector-specific standards, we have voluntarily committed to complying with high energy standards (ISO 14001). We also source RSPO-certified palm and palm kernel oil derivatives and are audited annually by RSPO auditors to ensure compliance with the standard.

In 2022, we were certified according to the SMETA audit (social standard) for the first time. We thereby allow our ethical and fair labour practices and values-based collaboration with our employees to be monitored by independent auditors.

#### OUR SUSTAINABILITY STRATEGY

#### 21 MANN & SCHRÖDER COSMETICS 2023 SUSTAINABILITY REPORT OUR SUSTAINABILITY STRATEGY

of the certification	Purpose
C Standard national Featured ard – Household and nal Care)	Certification for household and personal care products, evaluates a company's safety and quality management system, as well as production-related processes (from purchasing to dispatch).
P Global Standard h Retail Consortium – mer Products)	Evaluates a company's product safety and quality management, sets requirements for the production and delivery of safe, legal consumer goods (personal care and household) in uniform quality.
1 150 9001	Demonstrates that a quality management system is in place to continuously improve pro- cesses and products and that normative and legal requirements are fulfilled in the company.
N ISO 14001	The aim of the certification is to encourage environmental protection, reduce environmental impact and thereby correctly implement environmental goals.
I ISO 50001	The aim of the certification is to sustainably improve the company's energy efficiency and consumption.
etics GMP cordance with DIN EN 2716)	Proves that the company's working processes (from manufacturing to dispatch) comply with Good Manufacturing Practice (GMP).
dtable on Sustainable Dil)	RSPO was developed as a global standard for sustainable palm oil with the aim of estab- lishing and promoting ecological, economic and social minimum standards for the cultiva- tion of oil palms and integrating them into the entire supply chain.
JE	With the NATRUE label, a reliable, verifiable international standard, cosmetic products can be certified as natural or organic cosmetics.

#### RESEARCH & DEVELOPMENT

## SUSTAINABILITY IN THE R&D SECTOR

hen R&D is mentioned, we often think of employees in white gowns and protective glasses working meticulously in labs on the composition of creams and shampoos. "That is the case for around half our employees", says Dr. Klaus Hempel, Head of R&D. But the R&D sector also plays an important role in communication within the value chain: from suppliers to end consumers. As well as the R&D lab, Technical Product Management (TPM), Raw Materials Management (RM) and Safety Assessment (SA) are also part of this sector.

TPM is already involved with brainstorming, as well as ingredient and formulation selection. RM enquires about these raw materials and requests evidence of sustainability issues, the MANN & SCHRÖDER COSMETICS minimum standards along with potential impurities. The formulation is then developed in the R&D lab. Both the raw materials selection and manufacturing process play a role here and influence the sustainability of a formulation, for instance. Once samples have been successfully produced by the R&D lab, TPM supports the sales team in customer presentations and answers questions on the composition, labelling options and sustainability aspects. If the customer likes our suggestion, the SA team enters proceedings. The team assesses product safety and prepares the legally required safety report. The course is now set for a new product that has undergone intensive testing in line with our social and ecological responsibility as a manufacturer.

#### 24 MANN & SCHRÖDER COSMETICS 2023 SUSTAINABILITY REPORT PRODUCTS AND INNOVATIONS

## VEGAN /

RAW MATERIALS WITHOUT ANIMAL ORIGIN

### NATURAL AND EASILY BIODEGRADABLE

RAW MATERIALS

#### **NATURAL COSMETICS = SUSTAINABLE?**

In addition to its range of prestigious standard cosmetics, MANN & SCHRÖDER COSMETICS has developed a wide range of natural cosmetics in the last few years. Be it body lotion or hand cream, shower gel or shampoo, we have the right solution for all areas of use – always focusing on good skin compatibility, of course. But are natural cosmetics sustainable per se?

Natural cosmetics differ from conventional cosmetics in several aspects. Natural and easily biodegradable raw materials are used as ingredients in natural cosmetics, whereas synthetic ingredients are also used in conventional cosmetics. Furthermore, we only use vegan raw

materials with no animal origin in our natural cosmetics. Transparency is important to us. This is why we do not use any self-created definitions or seals, but have developed and certified our natural cosmetics portfolio based on the established NATRUE standard for natural cosmetics. In addition to the ingredients used, this standard also regulates their origin and processing. This is monitored by a neutral institution that checks our formulations and audits us annually.

#### **DESIGN FOR SUSTAINABILITY**

The motto of the cross-divisional Category Management (CAT) team is "close to the market and fully informed about new raw materials". The CAT observes the market, two TMPs provide an initial assessment of the formulation and labelling and the R&D new developments team assesses its feasibility and subsequently works on the formulation.

"This routine approach helps us all progress, allowing us to act sustainably and innovatively together", says Juliane Schmid, Head of CAT. As well as daily collaboration, trade fairs are attended and suppliers invited to keep track of raw material innovations. "The cross-divisional assessment of the feasibility and chances of alternative raw material gives us the opportunity to become increasingly sustainable", says Dr. Viktor Rein, TPM.

#### SUSTAINABLE PRODUCT DEVELOPMENT

This year, the R&D sector examined all formulation bases in relation to their innovative potential. "All raw materials and formulation compositions were on the table", says Christina Lee, Team Leader of New Development at the R&D lab. "As in previous years, all formulations were reviewed again in 2023, particularly regarding emissions from the raw materials they contain." stated Dr. Carmen Matzke, Head of Regulatory & Sustainability:

**"BY ANALYSING** INDIVIDUAL RAW MATERIALS, **REGARD TO RAW MATERIALS."** 

Dr. Carmen Matzke Head of Regulatory & Sustainability

#### OVERVIEW

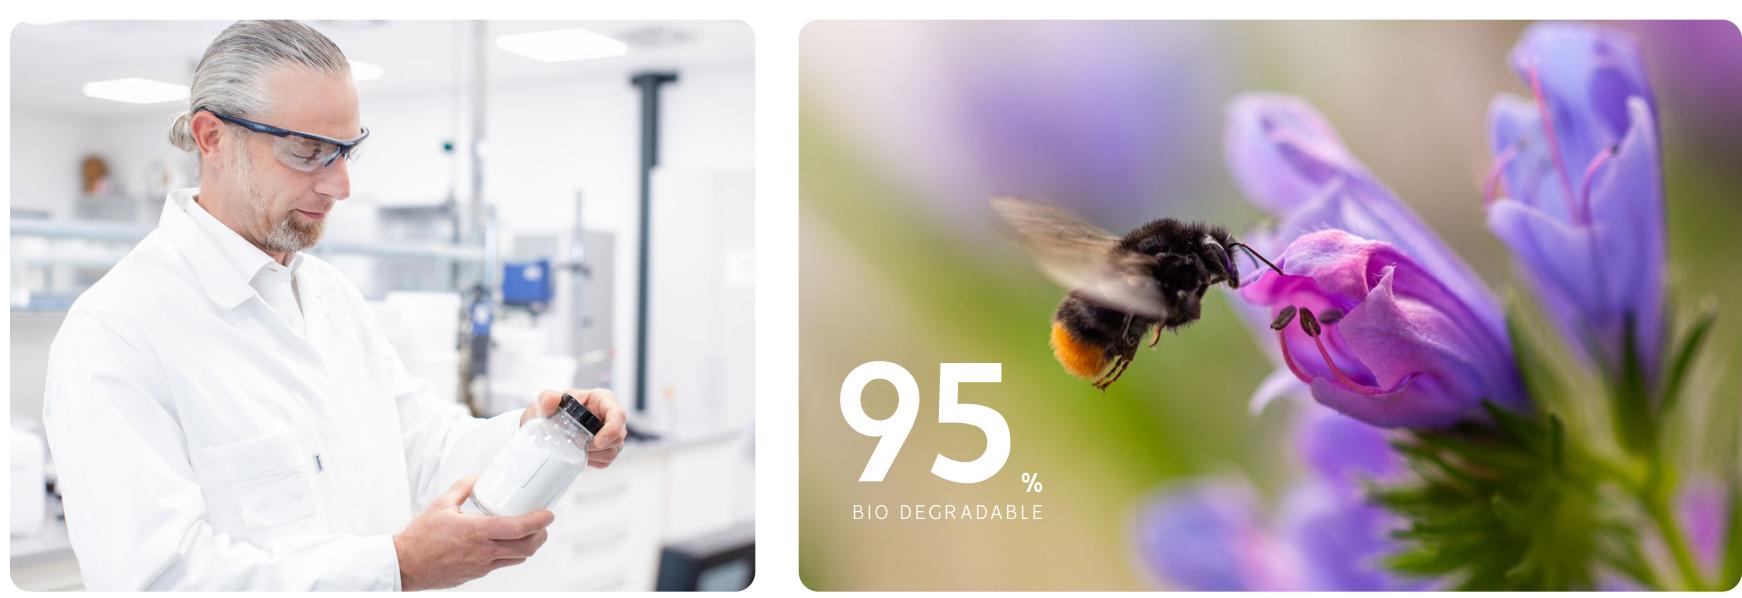

## WE WERE ABLE TO SIGNIFICANTLY **REDUCE OUR CO2 FOOTPRINT WITH** CO2

 $\mathbf{V}$ 

100%RSPO-CERTIFIED RAW MATERIALS FROM PALM OIL AND PALM KERNEL OIL: MANN & SCHRÖDER COSMETICS HAS ALREADY ACHIEVED THIS OBJECTIVE FOR ITS PRODUCTS.

#### **PRODUCT INNOVATIONS FOCUSING ON BIODIVERSITY**

Multiple raw materials of natural origin are used when manufacturing cosmetics. As part of a research project, the extent to which a skincare cream can be developed that is as sustainable as possible depending on different oils was investigated.

To this end, the sustainability of the oils was first analysed with a focus on biodiversity. The cream was then developed and analysed in relation to its physical and sensory properties. The results and the insights gained from them will be kept in focus in future developments of new formulations.

#### SUSTAINABLE MONOMATERIALS

# THE KEY TO A CIRCULAR ECONOMY?

n a world where sustainability and environmental protection are gaining more and more importance, recycling is playing a central role. Particular attention is paid to what are known as monomaterials, which have significant ecological benefits. But what makes monomaterials so sustainable and how can they help solve our waste problems? paper or metal instead of several layers of different materials or packaging components. The big advantage of this is that monomaterials are much easier to recycle. Whereas time-consuming and expensive separation procedures are often required with composites to isolate the individual components, monomaterials can be reused in a single step.

#### WHAT ARE MONOMATERIALS?

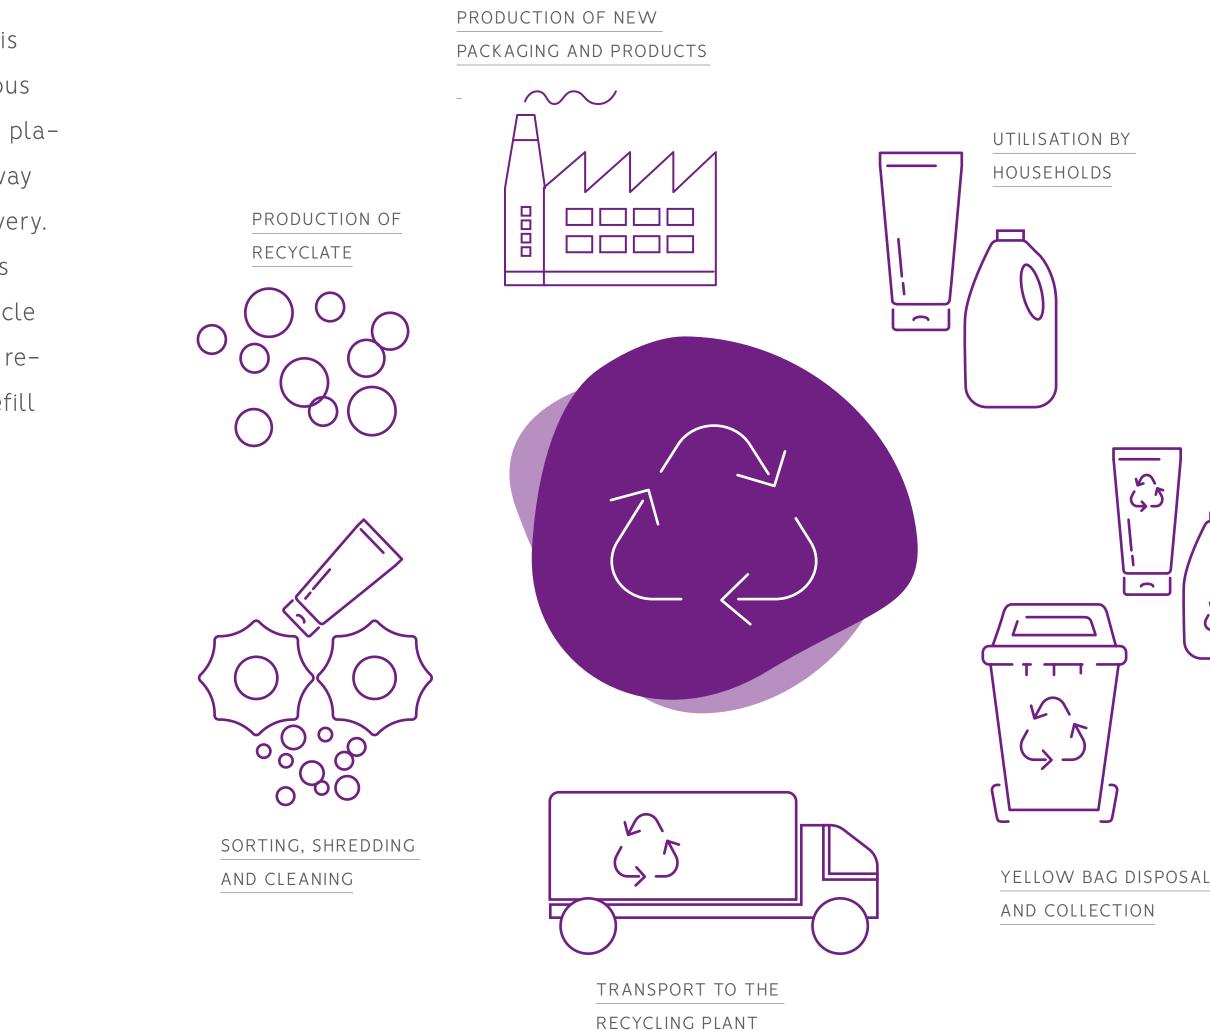

Monomaterials are materials consisting entirely of a single type of material. In the packaging sector, for instance, this means that packaging is made up of just one plastic,

#### THE ROLE OF MONOMATERIALS IN THE CIRCULAR ECONOMY

A circular economy focuses on keeping resources in the cycle of usage for as long as possible and minimising waste. This is where monomaterials play a role. They are easy to sort and can be recycled without complex processes, which significantly improves the efficiency of the recycling system. Ideally, products made of monomaterials can be melted down again with no significant loss in quality.

#### EXAMPLES OF MONOMATERIALS THAT WE CAN USE FOR A BETTER CIRCULAR ECONOMY

Our refill bags are made of mono-polyethylene (mono-PE), which were made of several types of plastic (PET/PE) before they were introduced at MANN & SCHRÖDER COSMETICS. These individual layers are bonded together, therefore mechanical separation is impossible. In conventional mechanical recycling, packaging is first collected and its components are then separated by mechanical force. This is unfortunately not possible with the previous refill bag, which consists of two different plastics. Until now, incineration as the only way this could be disposed of for energy recovery. However, a good circular economy implies that resources should be utilised in the cycle for as long as possible. We can meet this requirement with our mono-polyethylene refill bag.

#### WHAT CHALLENGES DO WE FACE AND WHAT SOLUTIONS DOES TECH-**NOLOGY OFFER?**

By using our mono-PE bags, we contribute to improving recycling and thereby reducing the environmental impact. Despite the many benefits of monomaterials, there are also challenges. A central issue is the fact that monomaterials frequently offer less functional properties than composite materials. Hence, further innovation is required to make monomaterials widely applicable and to overcome the challenges associated with them.

## WE DELIVER IN MULTIPLE COUN-PLE PACKAGING GUIDELINES

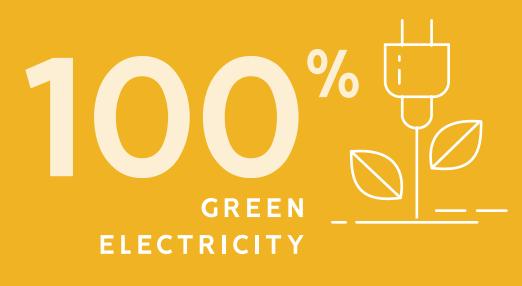

TRIES – SO ALSO CONSIDER MULTI-We use a special assessment tool to evaluate the recyclability of packaging. This tool translates multiple guidelines, directives and standards so that we can consider them in our packaging strategy. As a result, country-specific recycling infrastructure and circular systems are also assessed.

"WITH THE RIGHT MIX OF RESEARCH, DEVELOPMENT AND POLITICAL SUPPORT, MONOMATERIALS CAN MAKE A BIG **CONTRIBUTION TO A SUSTAINABLE FUTURE – AND BRING US** A BIT CLOSER TO THE DREAM OF A WASTE-FREE WORLD.

- Sara Zamur -

#### SUSTAINABLE SOLUTIONS

## ENERGY-EFFICIENT MACHINES & SYSTEMS

We are aware of our responsibility towards our environment. Hence, we are committed to keeping our energy consumption as low as possible through our technology.

ANN & SCHRÖDER COSMETICS constantly backs the development of sustainable technology to save energy. In previous years, modern LED lighting and efficient management at the two production sites in Siegelsbach and Hüffenhardt have been able to reduce energy consumption by up to 60%.

The plant in Hüffenhardt also uses the waste heat from machines to heat the buildings. This significantly reduced the amount of heating oil used, as well as saving cooling energy for cooling the compressors. These measures allow us to save energy and protect the environment.

"WHEN WE BUY NEW MACHINES AND SYSTEMS, WE ALWAYS MAKE SURE THAT THEY MEET OUR SUSTAINABILITY REQUIREMENTS."

Stefan Martin, Head of Technology

#### 2022

#### DEVELOPMENT OF TOTAL ENERGY CONSUMPTION IN THE COMPANY

At 15,768 MWh, the total energy consumption – electricity, gas and other energy sources – of MANN & SCHRÖDER COSMETICS has remained at the same level (-0.2%) as the previous year (15,794 MWh). Taking into account the 3.45% increase in the number of units, the energy consumption per unit has generally been reduced.

## Total energy consumption 15,794 Total energy consumption

15,768

#### REDUCE CO<sub>2</sub> EMISSIONS WITH 100% GREEN ELECTRICITY

Compared to conventional electricity, which is largely generated from fossil fuels and nuclear energy, green electricity leads to much lower CO<sub>2</sub> emissions and thereby actively contributes to climate and environmental protection. This is why MANN & SCHRÖDER COSMETICS has relied exclusively on 100% green electricity at both production sites since January 2014. We are reducing our CO<sub>2</sub> emissions by using green electricity and with annual total energy consumption of around 15,700 MWh.

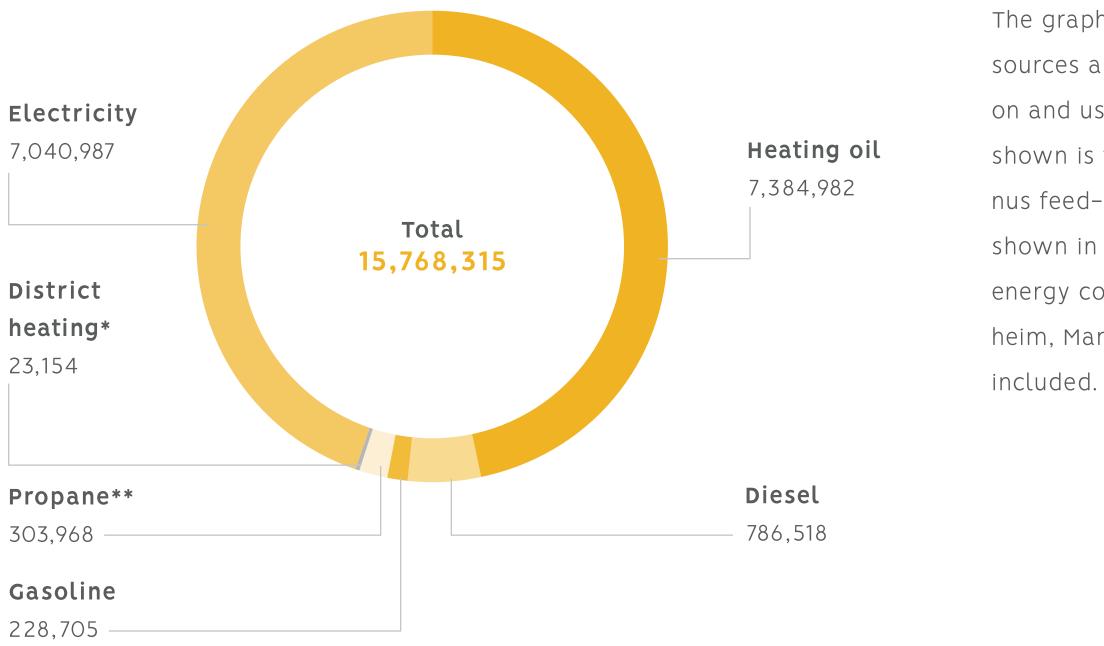

GREEN ELECTRICITY

ENERGY VOLUME 2023 (KWH/A)							
	Heating oil	Diesel	Gasoline	Electricity	Propane	District heating	Total
Siegelsbach	1,248,505	393,259	114,352	1,722,029	0	0	3,478,145
Hüffenhardt	6,136,477	393,259	114,352	5,211,713	0	0	11,855,802

#### VALUE SAST (VILLA)

#### ENERGY USED IN 2023 (KWH/A)

\*District heating: Amount of energy generated at the Mannheim site \*\*Propane: Amount of energy generated at the MUNA and Gundelsheim sites The graphic summarises the respective energy sources and quantities. The energy consumption and use by MANN & SCHRÖDER COSMETICS shown is the result of energy procurement minus feed-ins. As well as the production sites shown in the table, which have the largest energy consumption, the other sites Gundelsheim, Mannheim, Helmstadt and MUNA are also

<b>Scope 1</b> (Direct emissions)	i
<b>Scope 2</b> (Emissions from purchased energy)	(
Scope 3	i
(Indirect emissions from upstream	ć
and downstream value chain)	
Total	

As in previous reporting years, the manufacture of procured raw materials and packaging and the combustion of fossil fuels to generate heat in production were the biggest CO<sub>2</sub> driving forces. The resulting CO<sub>2</sub> emissions are shown in the table as direct and indirect greenhouse gas emissions in comparison to the previous reporting years.

#### **SCOPE 1**

The table shows that absolute CO<sub>2</sub> emissions have risen by 5.32% compared to the previous year (2022). Amongst other factors, this increase can be explained by the increased number of units, which rose by 7.8 million in 2023.

#### SCOPE 2

Emissions from the scope 2 category amount to O tonnes of CO2 and therewith O% of the total balance. Once again, no CO<sub>2</sub> emissions were incurred in the electricity category in 2023, since green electricity continued to be

SCOPE 3 procured and an emission factor of 0 was estimated for direct emissions. Looking at the to-The largest reduction in CO2 emissions is depictal electricity consumption at both locations in ted in scope 3. In relation to the quantity, scope 2023, this results in a saving of around 2,675 3 has fallen by 10.3%. This reduction in emissitonnes of CO2 compared to the use of the conons is primarily due to the company's largest ventional German electricity mix. source of emissions (87.6%): raw materials, consumables and packaging materials. The primary reduction was achieved thanks to the in-EMISSIONS creased use of recycling packaging and repla-**REDUCED** BY cing raw materials with high CO<sub>2</sub> emissions. #### OVERVIEW

Emission source	t CO2 2022	t CO2 2023
including process and building heat	2,312.28	2,435.24
Green electricity	0	0
including raw materials, pack- aging materials, transport, business travel	100,295.19	91,141.78
	102,607.47	93,577.03

#### WITH SOLAR POWER

We also use solar power across a total of 714 m<sup>2</sup>. Our solar plant at the Hüffenhardt site converts the radiant energy of sunlight directly into electrical energy using photowas fed into our electricity grid in 2023 and used where required – quickly and in an environmentally-friendly manner.

SOLAR PLANT

#### **INTENSITY OF CO2 EMISSIONS**

#### Overview of the absolute figures for net turnover,

#### number of units and CO<sub>2</sub> emissions

	2021	2022	2023
Turnover (net, T EUR)	150,561	179,351	201,094
Number of units produced	199,541,548	226,599,228	234,428,051
CO₂ emissions (kg)	92,518.18	102,607,473.25	93,577,024.73

#### Overview of net turnover, number of units and bulk

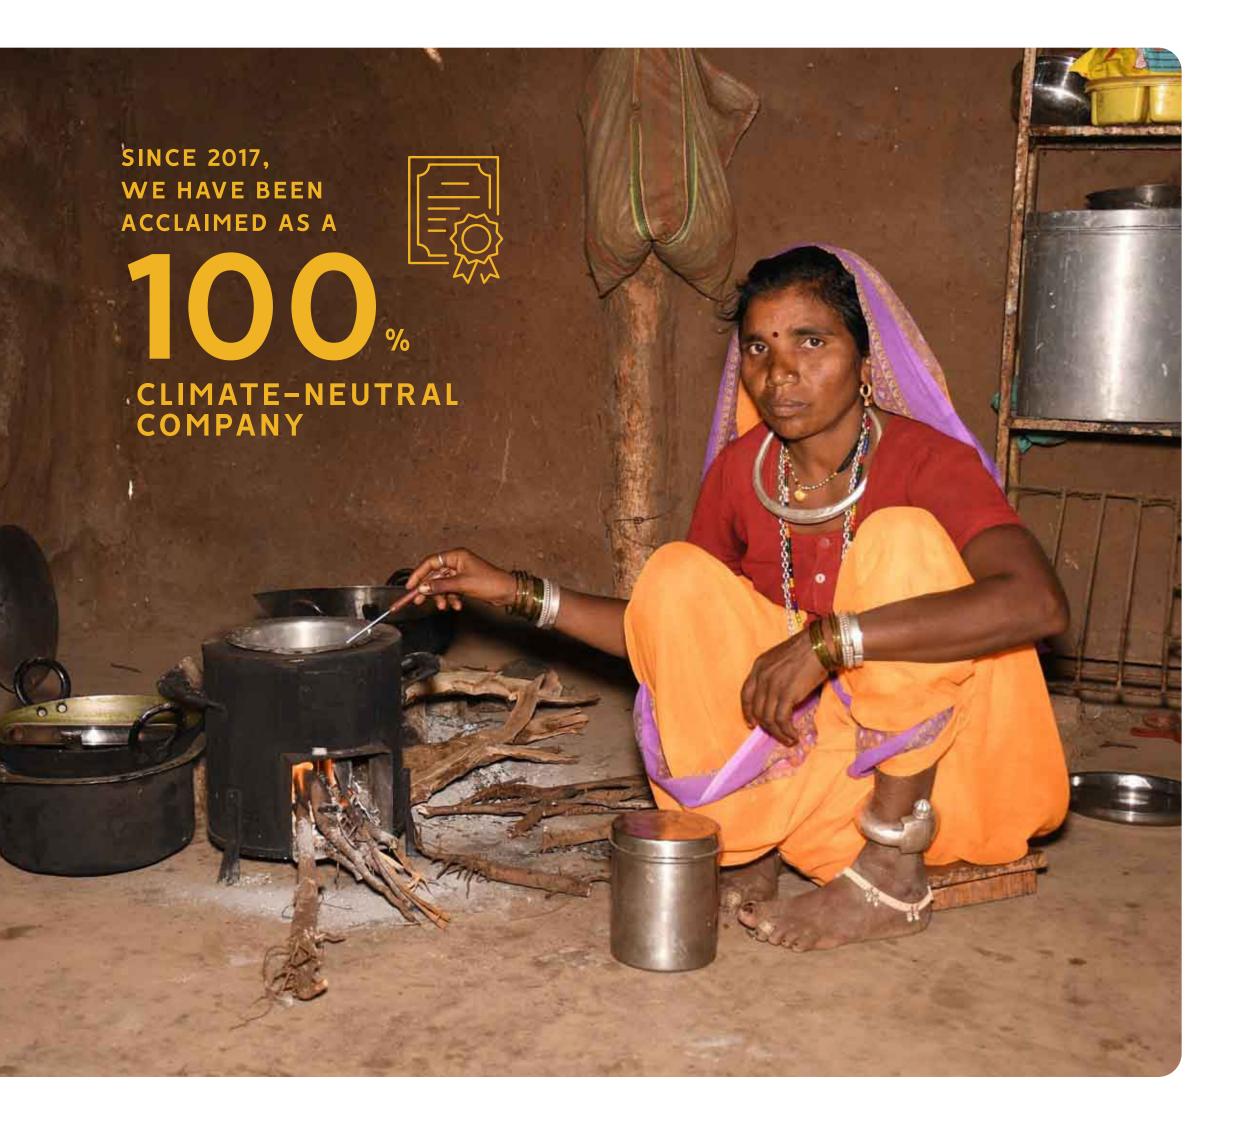

#### in relation to CO<sub>2</sub> emissions

	Unit	2021	2022	2023
Turnover (net, EUR)	kgCO₂/EUR	0.61449	0.57210	0.46534
Number of units pro- duced	kgCO₂/1,000 units	0.46365	0.45281	0.40754
Bulk pro- duced	kgCO₂/kg	2.20586	2.10331	1.96154

In 2023, the average level of CO2 emissions per 1,000 units was 0.408 kg CO2 and therefore significantly below the previous year's level (0.45 kg CO<sub>2</sub>/1,000 units).

#### **CLIMATE-NEUTRAL COMPANY**

Together with ClimatePartner, we log our company's annual CO<sub>2</sub> emissions and create a comprehensive Corporate Carbon Footprint (CCF) based on the Greenhouse Gas Protocol. This covers all greenhouse gas emissions from Scope 1 to 3, including the supply chain of raw materials and packaging materials. In 2023, emissions totalled 93,577 tonnes of CO<sub>2</sub>.

As a manufacturing company, MANN & SCHRÖDER COSMETICS cannot completely avoid CO<sub>2</sub> emissions. However, we endeavour to take a holistic approach to climate protection. Our aim is to avoid unnecessary emissions, reduce existing emissions and offset unavoidable emissions. We do this by purchasing emission certificates and support a climate protection project to provide efficient ovens in India. This contribution supports the distribution of ovens requiring less firewood and reduces both air pollution in indoor areas and CO<sub>2</sub> emissions.

#### ENERGY AUDIT 50001

## M&S SUCCESSFULLY ISO 50001 CERTIFIED

he level of priority given to energyefficient manufacturing at MANN & SCHRÖDER COSMETICS is also demonstrated by how the company was certified in 2019 in accordance with internationally recognised standards for energy management (DIN EN ISO 50001). The aim of the certification is continual improvement of the company's energy-related performance.

piece of equipment can we identify specific potential savings and act more efficiently." This is why MANN & SCHRÖDER COSMETICS decided to introduce its energy management system in accordance with the standard from the outset and has been successfully DIN EN ISO 50001:2018 certified since the end of October 2019.

"Collecting energy-relevant data is essential for us as a manufacturing company to increase our energy efficiency in the long term", says Matthias Wörner, Management of Technology and Operations at MANN & SCHRÖDER COSMETICS. "Only if we know the detailed consumption of every

"COLLECTING ENERGY-RELEVANT DATA IS ESSENTIAL FOR US TO INCREASE OUR ENERGY EFFICIENCY IN THE LONG TERM."

#### IMPLEMENTING ENERGY-SAVING MEASURES

Our progress in implementing our energy targets and action plan is audited annually by an external testing institute. Furthermore, our energy consumption (electricity, heat, gas, oil and compressed air) is systematically recorded and monitored.

> Matthias Wörner, Management of Operations

RESPONSIBLE USAGE

#### **39** MANN & SCHRÖDER COSMETICS 2023 SUSTAINABILITY REPORT USE OF WATER

#### KEY RESOURCE

## WATER – THE SOURCE OF LIFE

Just like we need air to breathe, we need water for survival. We consider water a precious, vital commodity and therefore invest in modern technology so we do not waste this valuable resource.

ater is an important component of most personal care products. It makes creams and lotions smooth, dilutes cleansing surfactants and binds water-soluble substances such as glycerine. Since the human body is made up of around 65% water, it is easy to understand

that products for its care also contain large proportions of this building block of life.

Encouragingly, we could reduce our water consumption per product once again in reporting year 2023.

#### WATER CONSUMPTION MANN & SCHRÖDER COSMETICS

	2022	2023	Change 2022 – 2023	
	absolute	absolute	absolute	in %
Absolute water consumption	94,339 m³	97,270 m³	+2,931 m³	+3.10%

#### WATER CONSUMPTION **BY PRODUCTION SITE**

	2022	2023	Change 2022 – 202	
	absolute	absolute	absolute	in %
Hüffenhardt	69,511 m³	70,176 m³	+665	+0.95%
Siegelsbach	24,828 m³	27,094 m³	+2,266 M³	+9.12%
Products Number of units	226,599,228	234,428,051	+7,828,823	+3.45%

We manufactured 3.45% more products in 2023 than in the previous year (2022), whereas water consumption increased by just 3.1% in the same period. This means that our use of water per product produced has fallen by 0.35%. Our careful approach to water is therefore paying off and our water-saving measures are taking effect.

CHANGE 2022 – 2023: -0.35 WATER CONSUMPTION PER PRODUCT

#### **CAREFUL APPROACH**

We are aware of the value of water and have committed ourselves to a careful approach with this vital resource. In specific terms, this means that we have been investing in technology for years and establishing targeted measures to save water.

Different systems and modern technology have allowed us to save water whilst increasing production. As well as efficient water desalination, cleaning our pipework with the pigging system and steam cleaning, we can take further measures to save even more water.

#### **ECOBULKS AND SURFACE JET**

In spring 2020, we replaced IBC containers with Ecobulks. These containers are bevelled so that less filling material sticks to them once they are emptied. This makes cleaning much easier, saves water and helps to utilise the quantity produced more efficiently. The containers are cleaned at dedicated cleaning stations. The surface jet used since then is very efficient in terms of water consumption and cleaning can be done in just 15 minutes.

#### **BOILER CAPACITY**

Better utilisation of boiler capacity is another key step towards saving water. We achieve this by increasing the production volume to the boiler's full capacity in order to optimise the batching ratio, i.e. commissioning the boiler for cleaning. The fact is that whether a production boiler works with a large or small capacity, it has to be cleaned after every use regardless. Full boiler utilisation is beneficial for the ratio of filling material/cleaning and thereby for the water consumption of each individual product.

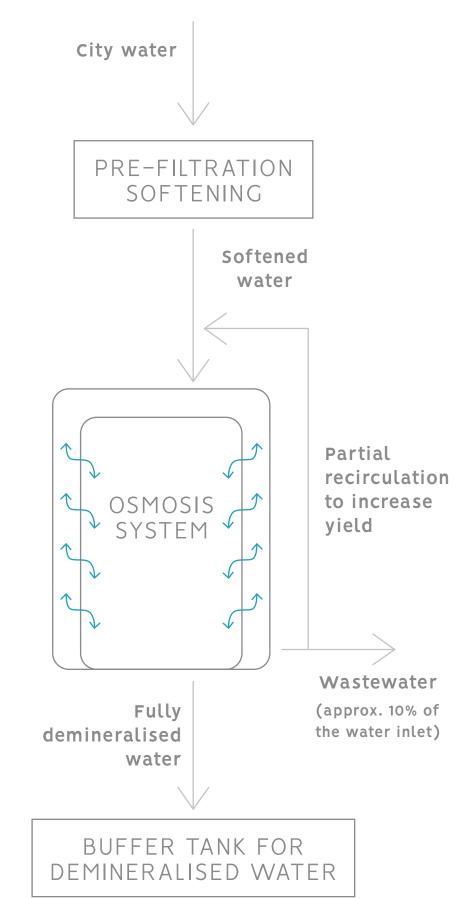

#### **EFFICIENT THANKS TO OSMOSIS**

At MANN & SCHRÖDER COSMETICS, we only use purified, non-saline water for manufacturing our personal care products. This allows us to determine exactly which ingredients should be included in our products and which should not. Non-saline water also has the advantage of being non-corrosive. It is therefore gentle on materials, which extends the service life of machines.

To obtain pure, non-saline water, we use the tank, which acts as a kind of storage tank. most efficient and ecological method with the Pure water can then be used for the productiosmosis system. To do so, we work with an on of care products. osmosis system of the highest configuration. Investing in additional buffer tanks also has a Around 90 litres of fully demineralised water can be obtained from 100 litres of tap water positive impact on water consumption. Thanks and 10 litres are fed back into the wastewater to high storage capacity, the osmosis system as salt concentrate (retentate). The system sehas to be started up and cleaned less freparates salt from water using a filter system quently. This allows us to save over 15,000 litand returns demineralised water to a buffer res of water per day.

#### **OSMOSIS SYSTEM:** EFFICIENT AND ECOLOGICAL

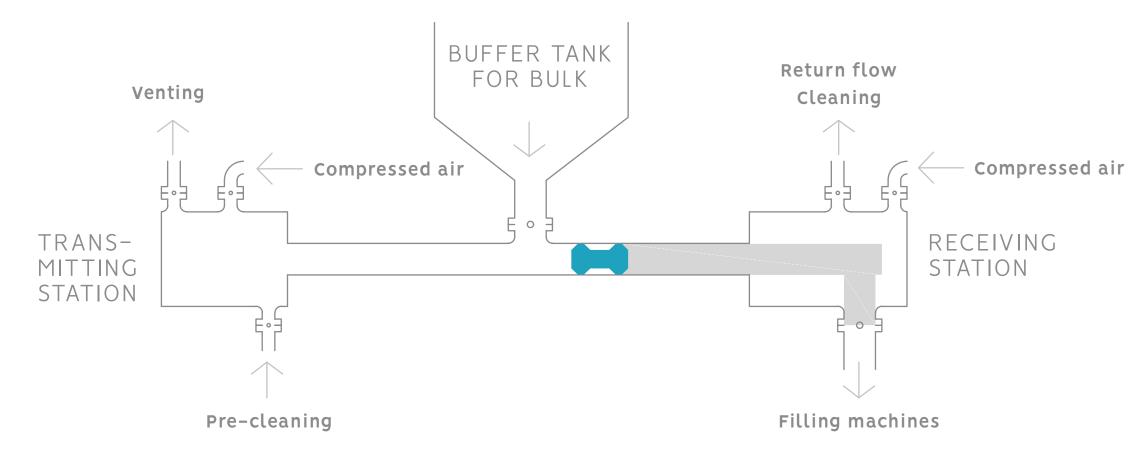

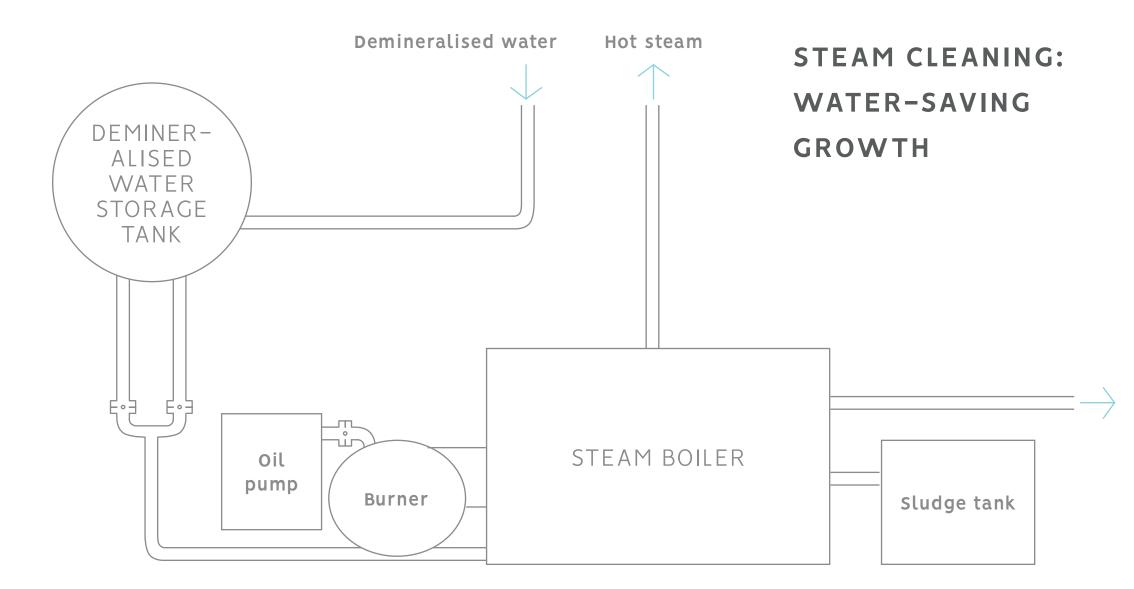

OVER 15,000 LITRES OF WATER SAVED PER DAY

#### **INGENIOUS PIGGING**

We have fitted our pipework system with ingenious pigging technology. The pigging system has two positive effects: it salvages filling material and helps to save water. This is because a small rubber stopper (pig) pushes any remaining filling material through the pipes at the end of the filling process to clean them. Consequently, far less water is required for cleaning.

#### **PIGGING SYSTEM:** MORE PRODUCT, LESS WATER

## WATER SAVED FROM CLEANING THE SYSTEMS

#### **STEAM INSTEAD OF WATER**

Fast and water-saving steam cleaning has been used at our production sites since 2018. Since we switched to steam cleaning, we have saved around 50% water, not to mention needing far less cleaning agents. This also results in less contaminated wastewater. Our conclusion: steam cleaning is an excellent environmentally-friendly method.

#### REDUCE, REUSE, RECYCLE

## WASTE MANAGEMENT

AVOIDING PACKAGING WHEREVER POSSIBLE

REDUCE

**REDUCING** MATERIAL WITHOUT JEOPARDISING PRODUCT SAFETY

MATERIAL

## **CIRCULAR ECONOMY** THROUGH RECYCLING

ackaging protects the product that is close to our hearts. It provides important information, facilitates transport and often influences the decision to purchase. For us, however, packaging must be one thing above all: environmentally-friendly! Whether paper, cardboard, plastic or glass – a responsible approach to raw materials runs through our entire value chain and does not stop when materials become waste and have to be disposed of. Together with our disposal

partners, we are consistently backing recycling and thinking in cycles. The basis of our waste management is thorough waste separation.

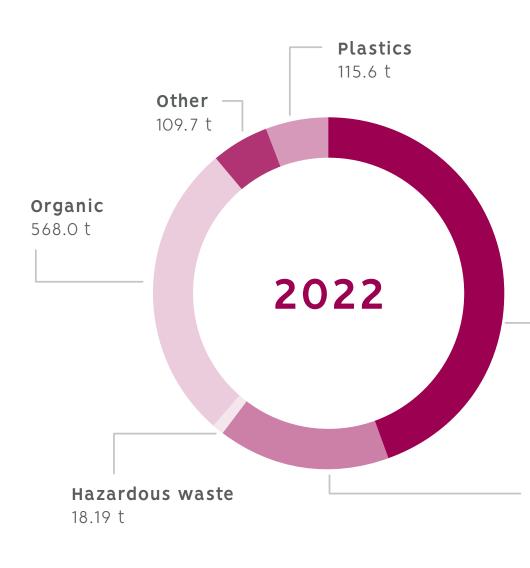

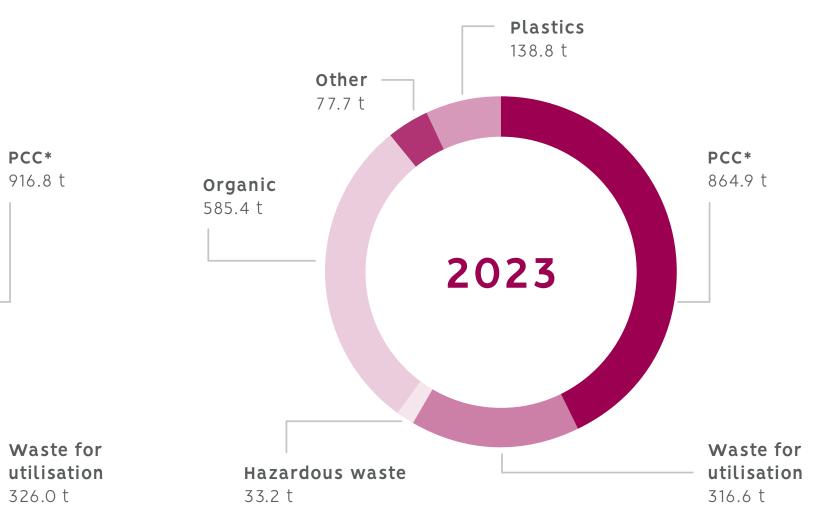

WASTE MANAGEMENT

#### WASTE VOLUMES BY WASTE TYPE

The amount of non-hazardous waste in 2023 was around 2,220 tonnes. This is almost 1.4% lower than in the previous year. The amount produced increased by 1.3% compared to 2022. Hence, the amount of waste generated could be kept at a constant level. Hazardous waste, which primarily includes raw material waste and highly flammable liquids, only accounted for a small proportion of total waste and is not analysed separately for 2023. Due to the high collection effort involved, it was therefore no longer listed separately in the sustainability report. In addition, sludge from our wastewater treatment was not included as waste in the calculation.

#### **VOLUME BY TYPE OF WASTE**

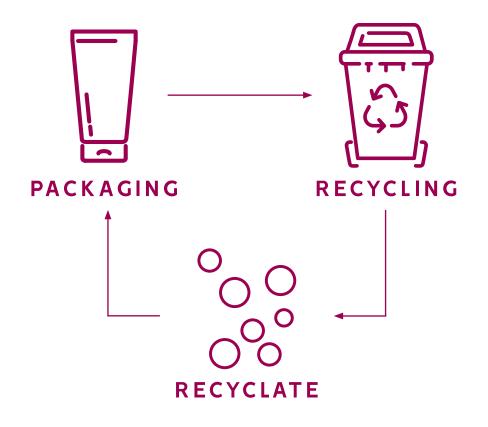

#### SUSTAINABLE USAGE OF PLASTICS

When using plastics, we make sure that they can either be reused (recycled) or are already made from recycled material (recyclate). This is the only way to complete cycles and conserve resources. What is known as PCR material (post-consumer recycling material) prevents the need to produce more and more plastic from fresh crude oil, which can save large amounts of energy and CO<sub>2</sub>.

#### RECYCLABILITY

In the reporting year, the proportion of recyclable waste was just under 94%. Almost all paper and cardboard was recycled, which, along with film and plastics, make up the majority of the materials we recycle. All of our residual waste and recyclables containers are equipped with waste compactors to compress the volume of waste. This means that the containers can be filled for longer and need to be emptied less frequently. This saves the waste disposal companies travelling to the site and therefore saves a lot of CO2.

#### STRONG AND DIVERSE

## OUR EMPLOYEES

GERMANY'S BEST TRAINING COMPANIES

#### 49 MANN & SCHRÖDER COSMETICS2023 SUSTAINABILITY REPORT EMPLOYEES

#### STRONG TOGETHER

### YOU AND I – US

All employees should feel comfortable in our company and be able to develop positively, because success is only possible together.

ANN & SCHRÖDER COSMETICS is made up of many different employees at very different workplaces – with diverse tasks and daily challenges. Every individual counts and the big US as a collective. Whether palletising on the forklift, creating samples in the lab or working from home on video calls with customers, each of our employees does an outstanding job and contributes to the collective success of MANN & SCHRÖDER COSMETICS in their own way. We would like to honour this as an attractive em-

ployer and support it to the best of our ability. Examples include announcing two extra annual leave days for all full-time employees from January 2024, the possibility of mobile working for a harmonious work-life balance and the wide range of health and leisure options. We wish to strengthen the sense of US with our voluntary #gerneperdu initiative.

#### **50** MANN & SCHRÖDER COSMETICS2023 SUSTAINABILITY REPORT EMPLOYEES

**"FLEXIBLE WORKING** HOUR MODELS AND **HEALTH OPTIONS ARE IMPORTANT FOR ENSURING THE** WELL-BEING OF OUR **EMPLOYEES.**"

Alexandra Fischer, Human Resources Management

#### MOBILE WORKING

The combination of mobile working with days at the company workplace has become further established in 2023. As a modern company in a constantly evolving world of work, we would like to offer our employees more location flexibility in their day-to-day work. We believe there are many good reasons in favour of this: more time for family and leisure activities, fewer kilometres driven on the roads and therefore less CO₂emissions. Thus, the positive effects aren't just evident in an improved work-life balance for individuals, but in terms of the environment as a whole.

Thanks to new technological possibilities, our employees can dial into their online appointments and internal or external meetings quickly, efficiently and above all flexibly in terms of location, depending on their remit. We are pleased about the positive responses from different areas and the high productivity of our employees regardless of whether they work on a mobile basis, from home or in the office.

FAMILY-FRIENDLY As a family-owned company, MANN & SCHRÖ-DER COSMETICS understands the needs of working parents and supports them in balancing family and career, for example, by enabling part-time work and mobile working. Our aim is to offer employees a pleasant working environment. This includes fair pay, additional company benefits and flexible working hour models. We make returning from parental leave as easy and attractive as possible, offering attractive part-time models. As in previous years, more women (57%) than men (43%) were among the 805 employees (as of 31 December 2023). The group between 30 and 50 years of age is most represented (49%), followed by the over-50s (27%) and under-30s (24%). In 2023, 30 of our employees took parental leave.

#### COMMUNICATING DIGITALLY

Good communication is an important component of the daily working routine and the basis for successful cooperation. Our company's own employee app is a very popular and practical way of communicating with and for our employees. This is reflected not least in the average registration rate of 88% of our workforce. Our employee app is constantly evolving with new uses and has featured in the new COSMuS user profile since the reporting year.

In almost 150 news articles in 2023, we provided information on current topics relating to the company and are delighted with the great commitment of our employees to joint campaigns, such as the MANN & SCHRÖDER COS-METICS Easter prize draw.

**CYCLING DOESN'T** JUST SAVE ON **BUT ALSO** BOOSTS EALTH

#### **BICYCLE FOR EMPLOYEES**

Those who cycle to work are rewarded. MANN & SCHRÖDER COSMETICS has been a cooperation partner of a bike leasing company since September 2021 and employees can lease a bike or e-bike at a reduced rate. Cycling saves CO₂ and promotes health too – both aspects that we very much welcome.

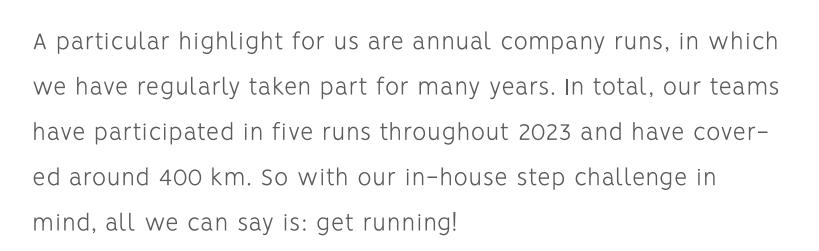

#### **HEALTH-FOCUSED WORKPLACE**

The topics of health and workplace safety are a major priority in our company. We set a standard that goes beyond current legislation. In addition to safe, ergonomic workplaces, e.g. with PPE or height-adjustable desks, we also offer our employees a wide range of activities for improved well-being. With our health days related to backs, a fascia workshop and many more exercise and sports programmes, we would like to provide the opportunity for team sport or for personalised sporting pursuits. What's new in 2023 is MANN & SCHRÖDER COSMETICS collaborating with two gyms so our employees can start personal training on a good footing.

#### FREE EYE TESTS

Through our company doctor, we offer all employees regular examinations, including eye tests, for example. If the need for computer glasses is identified, MANN & SCHRÖDER COSMETICS will contribute to the costs. Safety glasses in your own prescription are also subsidised.

#### ANNUAL LEAVE

As an employer of over 800 people, we have decided to increase the number of annual leave days and communicated this to the workforce. Specifically, all full-time employees will gain two extra days of annual leave from the coming year. For parttime employees, this ruling applies on a pro rata basis according to working days.

#### **PROMOTING YOUNG TALENT**

As an innovative company, MANN & SCHRÖDER COSMETICS wants to shape the future and involve the younger generation from the very beginning. In 2023, we employed 41 trainees and students from the dual study system in a total of 14 different apprenticeships and dual study programmes. Young people are accompanied by mentors. For us, training predominantly represents tangible experiences, self-confidence and a sense of personal growth. Special activities such as driver safety training also ensure a sense of good team spirit and, of course, improved road safety. In the reporting year, we have been acclaimed six times by renowned institutes for our outstanding training quality.

#### ACCLAIMED

#### TRAINING WITH QUALITY

As in previous years, MANN & SCHRÖDER COSMETICS is again in 2023 one of Germany's best training centres. This is confirmed by evaluations by Focus Money, Top Ausbildung, F.A.Z. Institut, Capital, Handelsblatt and WELT.

> READ MORE ON TRAINING AND STUDY

#### GIRLS' DAY

As part of Girls' Day, 15 girls had the chance to experience MANN & SCHRÖDER COSMETICS up close. Whether in Research & Development, IT or Technology, it was a day full of exciting discoveries for the young girls and a glance at interesting areas of our company.

## GIRLS!

#### TRAINING CONCEPT

As part of an HR initiative, we developed a training concept in 2021 in which processes were standardised and procedures were adapted at a uniform level. New trainers and mentors who took over the respective specialist areas according to their qualifications were trained and educated within our organisation. All content was revised in line with the relevant specifications (e.g. IHK training framework plan and DHBW specifications) and tightened up where necessary. This project has made training and the dual study programme at MANN & SCHRÖDER COSMETICS more comparable and transparent within the various professions.

We introduced the digital report booklet the previous year. Our trainees can use the app to log their weekly training records online and send them directly to their trainers. This saves time, money and paper. Thanks to the simple operation of the app, which is used to maintructions and tasks are documented in the vices at any time in digital form

OVERVIEW tain training records, trainees can also complete their report booklet on the move. All insreport booklet. It is available on all end de-TRAINING COOPERATION In 2023, MANN & SCHRÖDER COSMETICS entered into a training cooperation with a company specialising in conveyor technology. Trainees in technical professions can experience departments that don't exist in our company. The same applies for our partner company: their trainees come to us to complete training segments that our cooperation partner does not offer.

#### TRAINING FOR ALL

It's not just apprentices and students who learn at MANN & SCHRÖDER COSMETICS; all employees receive regular training. In addition to mandatory training in occupational safety and data protection, we offer hygiene and GMP training, driver training, learning units on sustainable packaging and awareness, as well as courses on mobile working and managing virtual teams on our own online learning platform. Employees also have the opportunity to take part in customised training courses at external institutes.

#### **ONBOARDING**

To give new employees the best possible start, our HR department is constantly working to optimise the M&S onboarding process. They receive the most important training and basic information about their new working environment on an extra onboarding day. All further details can be found below – including the mandatory training that all employees must regularly complete. Documents for administrative staff are now provided only in digital form, which significantly saves on paper and counts towards our sustainability goals.

#### 56 MANN & SCHRÖDER COSMETICS2023 SUSTAINABILITY REPORT EMPLOYEES

#### **SAFETY & PREVENTION**

MANN & SCHRÖDER COSMETICS goes beyond the applicable standards and laws to ensure a safe and hygienic working environment. With this in mind, we analyse and monitor relevant work processes for potential health and safety risks and take appropriate measures to reduce hazards. A further objective is to avoid accidents at work and to protect our employees through preventive health measures. The aim is to prevent employees from being absent from work for long periods of time.

We work closely with an external occupational safety company and hold joint meetings of the Occupational Safety Committee every three months. Topics relating to accident prevention and protection in the workplace are discussed here. The participants from MANN & SCHRÖDER COSMETICS include representatives from various departments of our company and the works council, as well as the company

doctor. The meeting is chaired by the occupational safety department and a member of the management.

In 2023, the number of accidents at work resulting in more than three days' absence from work was 19.

There is no group of employees in our company that is exposed to such a high risk due to their work that a particularly high rate of illness is recorded. If risks are discovered during the risk assessment, we immediately establish measures to reduce exposure.

#### **CO-DETERMINATION**

In our opinion, a trusting cooperation between employers and employees can only bear fruit if employees have a say. We promote this co-determination by conducting surveys – for example, on satisfaction with working from home. The company's own app also promotes internal communication, as it gives all employees the opportunity to share their opinions and ask questions. We are happy to take on board suggestions for improvement and implement them where possible.

#### WORKS COUNCIL

The works council is the most important link between employees and the employer. It represents the interests of all employees, both in administration and production, and is in constant dialogue with the company management in a spirit of trust. HR management and the works council meet on a weekly basis. Information on significant operational changes is provided in a timely and comprehensive manner in accordance with legal requirements – negotiations are possible at any time.

#### LEADING EMPLOYER

Once again in 2023, MANN & SCHRÖDER COSMETICS was recognised as a Leading Employer and, according to studies from F.A.Z. Institut, WELT and Focus, is one of Germany's best employers.

#### **LEADING** EMPLOYER

#### AWARDED 2023

EXCLUSIVELY AWARDED TO THE COUNTRY'S TOP 1%

## SOCIAL COMMITMENT

SOCIAL COMMITMENT

### **ACTIVE ASSISTANCE**

As a company, we have assumed responsibility for people and our planet. In our view, this also includes our commitment to the common good.

ANN & SCHRÖDER COSMETICS supports regional associations and organisations in particular, but also helps abroad.

We are convinced that organisations and associations that look after people in need, children and young people, as well as providing a home and care for animals, are indispensable for a strong community. That's why we offer our support!

#### WIDE-RANGING DONATIONS

We support the vulnerable, associations and institutions with donations in kind from our hair and personal care product portfolio. Here we focus on regional nurseries, sports clubs, animal homes and charitable organisations such as food banks. In 2023, we donated goods worth almost 30,000 euros to four local food banks in Baden-Württemberg.

In the event of war and disaster, we of course also help people beyond our national borders. Like last year, a large donation with over 14,000 shower gels, shampoos and baby care was sent to Ukraine.

#### 60 MANN & SCHRÖDER COSMETICS 2023 SUSTAINABILITY REPORT SOCIAL COMMITMENT

#### CAN DONATIONS FOR PEOPLE IN NEED

Helping people in need motivates our younger employees too. Under the motto "every can counts", trainees and dual students organised participation in the Dosenaktion Heilbronn project in 2023 – with the aim of supporting people in need in Heilbronn and the surrounding area.

With an appeal to colleagues, they were able to collect a total of 319 cans at the four MANN & SCHRÖDER COSMETICS locations. The cans and tins were then passed on to five social partners to distribute food to those in need through the Dosenaktion Heilbronn project team.

Price increases in the food industry are causing more and more people difficulties – food is becoming too expensive for many. The can campaign enables people in financial need to be given a hot meal. The can donations also have the advantage of directly reaching those in need, having a long shelf life and being able to be used by anyone.

#### ACTIVE FOR A GOOD CAUSE

colleagues played football together for a

THE TOURNAMENT RAISED AROUND FOR THE CHILDREN'S HOSPICE IN MOSBACH.

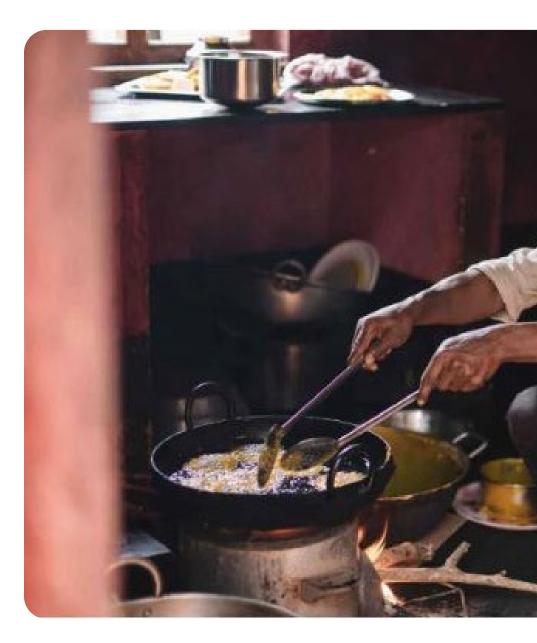

n collaboration with ClimatePartner, we have been measuring our CO2 emissions since 2017 and offsetting them via climate protection projects. This demonstrates how social commitment and climate protection go hand in hand at MANN & SCHRÖDER COS-METICS. Our previous climate protection projects were in Africa, and we have been supporting projects in India since 2023.

By supporting the Efficient Ovens projects, we are helping poorer families and households in India to improve their living conditions and save CO₂ at the same time. Families who use these efficient ovens also benefit from this clean cooking method from a health perspective, since they are no longer exposed to dangerous smoke pollution.

Since efficient ovens require far less wood for cooking, deforestation is significantly reduced, thereby protecting the environment.

#### YOU CAN ALSO FIND MORE INFORMATION ABOUT THE PROJECT HERE

EMISSION COMPENSATION

## SOCIAL AND CLIMATE-FRIENDLY

Climate protection projects allow us to offset our CO2 emissions, whilst helping people in India living below the poverty line.
